WEPD – Type I $[56, 28, 10]$

This is a database of known weight enumerator parameters for singly-even binary self-dual $[56, 28, 10]$ codes.

The possible weight enumerators of a singly-even binary self-dual $[56, 28, 10]$ code are given in [5] as

$$W_{56,1}^{\mathrm{I}} = 1 + (308 + 4\alpha)x^{10} + (4246 - 8\alpha)x^{12} + \cdots,$$
$$W_{56,2}^{\mathrm{I}} = 1 + (308 + 4\alpha)x^{10} + (3990 - 8\alpha)x^{12} + \cdots,$$

where $\alpha \in \mathbb{Z}$.

See the links below for lists of known values of α for $W_{56,1}^{\mathrm{I}}$ and $W_{56,2}^{\mathrm{I}}$.

- $W_{56,1}^{\mathrm{I}}$ known parameters (from [1–6])
- $W_{56,2}^{\mathrm{I}}$ known parameters (from [2–6])
