

WEPD – Type I [58, 29, 10]

This is a database of known weight enumerator parameters for singly-even binary self-dual [58, 29, 10] codes.

The possible weight enumerators of a singly-even binary self-dual [58, 29, 10] code are given in [6, 9] as

$$W_{58,1} = 1 + 55x^{10} + 5188x^{12} + \dots ,$$
$$W_{58,2} = 1 + (319 - 2\alpha - 24\beta)x^{10} + (3132 + 2\alpha + 152\beta)x^{12} + \dots ,$$

where $\alpha, \beta \in \mathbb{Z}$. A code with weight enumerator $W_{58,1}$ is given in [17].

See the link below for a list of known values of (α, β) for $W_{58,2}$.
